### Are You Destroying Your Great-Grandchild's Future?

We often wonder what the future holds for our descendants, don't we? In the 1940s, brave men and women worked to defend our freedom, beliefs and give future generations the opportunity to prosper.

Unless we make vital changes, future generations won't benefit from the world that we all know and love.

Imagine a world that looks like [this](#).

#### Global Warming Will

- Heat the water in lakes and oceans so they are uninhabitable.
- Melt ice-caps and ruin vital resources for animals.
- Cause extreme changes in weather.

You have a responsibility to make changes. By 2050, the world as we know it could fall apart. However, if you make some vital changes, you can be the difference.

#### Secure Your Family's Future

Green living isn't difficult, and the smallest acts can make the largest difference. We all know recycling is essential, and many of us follow guidelines to ensure we don't pollute.

#### People are working to change, and you can too!

Here are some great tips to ensure you contribute to the cause:

- Recycle everything you can and buy recycled products.
- Walk and cycle short distances instead of driving.
- Use alternative energy methods to power your home.

Solar power is cheap, effective, and it uses our most natural resource: The Sun.

We've used fossil fuels for too long, and now it's time to make a change. Find out how you can save money with Solar Panels [today!](#)

### Changing Seasons? How They Could Ruin Your Investments

Some states experience cold, snowy winters and some are lucky enough to have year-round sunshine. However, the weather can ruin your biggest investment.

#### Your Home is Your Future

When we buy a home, we see it as a safe place to live for our family. In reality, a house is so much more than a sanctuary. **It's your biggest investment.**

Think about how much money you spent on your house. When the kids grow up you'll sell it and move to a smaller place, right?

If your home is damaged, you could lose a lot of money. Protecting your investment is vital for your future.

## Protect Your Home

Making some small changes to your home can protect it from harsh weather conditions, including extreme heat, cold and storms.

Vinyl siding is an alternative to aluminum siding as it lasts longer and has more aesthetic appeal. It protects your home from damage and reduces the need for regular maintenance.

You can save money on repairs and your house will retain its exterior appeal. Vinyl siding is a way to protect your investment.

### The Hottest Household Items This Summer

Summer is approaching and there are some great household items to spend your hard earned money on. Here are our top suggestions:

#### 1. Instant Pot-Duo

Combine steaming, slow-cooking and pressure cooking for the ultimate culinary experience. This excellent cooker makes life more convenient and allows you to create some impressive recipes.

#### 2. Nintendo Switch

This portable gaming system gives Nintendo fans the chance to play fantastic games and a taste of the latest technology.

### **3. Samsung 64-inch QLED TV**

An incredible viewing experience is what most people want from their TV. Nothing beats Samsung TVs and their 65-inch set offers supreme quality, excellent sound and hours of entertainment.

### **4. Smart Appliances**

Smart Appliances work together to run your home. You can control them from your phone and they are available in most stores.

## **Thinking of Shopping For Summer?**

We all want the latest technology, but can you afford the potential repair and replacement costs? Home Warranty companies offer to replace and repair your items for a small monthly fee. They save you money in the long term and can prevent you from spending thousands when your items break or malfunction.

If you're looking for a home warranty, we've got an exclusive offer for you. Do you want one month free from one of the largest warranty providers? Click [here](#) to get the offer now.

## **Are You Wasting your Retirement Fund?**

Saving money for retirement enables you to enjoy the hard work you put in throughout the years. Retiring is no longer something to fear, but a life event to embrace.

Saving for the future means you can enjoy life and the freedom retirement offers. However, sometimes it's necessary to break into your savings account.

## Money Well Spent?

You love playing golf, or dream about retiring to that gorgeous beach community right? Every month you put a portion of your paycheck away and dream about your future.

An unsettling noise resonates throughout your home, and upon checking what it is, you discover your washing machine is broken.

So now you've got to either have it repaired or buy a new one. Both scenarios mean **spending** money.

## Did you know...

Most Households Don't Budget For Appliances and Household Repairs

Few people have cash on tap. Most need to save, budget and manage their money to make the most of it.

If you're spending money to fix your heating, appliances or other essential items then it's time to stop.

## Here's The Answer

You've probably got insurance for lost items and break-ins, but do you have a warranty policy for breakages?

We've found a company that offers 24/7 repairs, and will even replace your covered items. The rates are low and you'll save thousands for one small monthly payment.

First American Home Warranty is ready to take your call today, so don't delay.
